1. Welcome

Solumed Business Manager (SBM) is a complete point-of-sale and business-management system built for African businesses: shops, supermarkets, pharmacies, restaurants, bars, salons, hotels and mobile-money agents. It runs on Windows, macOS and Android.

- Offline-first - sell all day with no internet. Nothing stops.
- One-time licence - buy it once per till. No monthly fees for the standard app.
- Simple by design - the app hides features your type of business does not need.
- **NEW in 2026 - SBM Premium:** one shop on many devices, synchronised through the internet (subscription). See section 12.

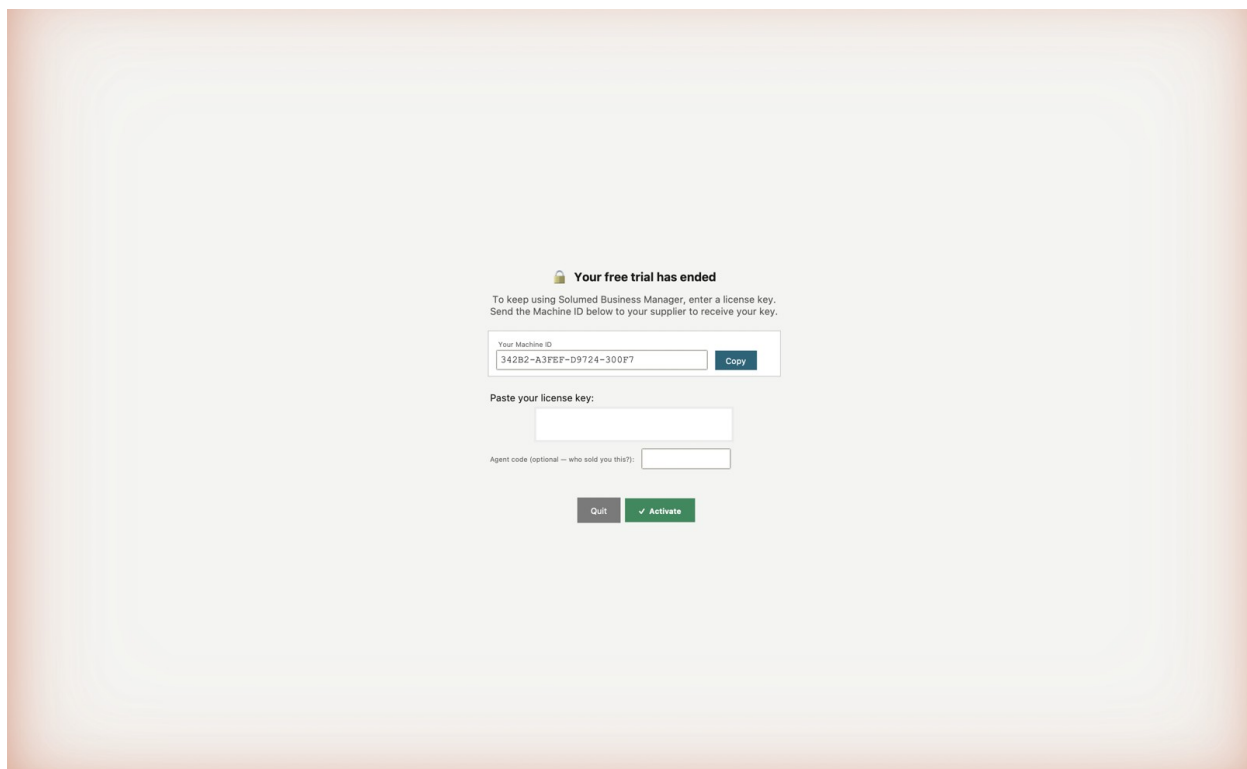

NOTE Everything in this manual can be practised safely: on the login screen press “Open demo shop” - a sandbox with sample data that never touches your real records.

2. Install, trial & activation

Install the app from the file your agent gives you or from solumedplus.com/sbm.html:

1. **Windows:** run the installer (Solumed Business Manager Setup.exe) and follow the prompts.
2. **Mac:** open the DMG and drag the app into Applications. First time: right-click the app → Open.
3. **Android:** install the APK (allow “unknown sources” once) - works on phones and tablets.

Every new install starts a free 14-day trial with all features. When the trial ends, the app locks and shows this screen:

Trial-end screen with your Machine ID - send it to your supplier to receive a licence key

1. Press Copy next to Your Machine ID and send it to your agent / Solumed Plus (WhatsApp 0775 377 245).
2. You receive a licence key back - paste it into the key box.
3. If an agent sold you the app, type their agent code (optional).
4. Press Activate. The app unlocks instantly - no internet needed.

You can also activate before the trial ends, or check your licence any time, in Settings → Account & licence:

Settings → Account & licence - licence status, Machine ID and key box

3. Signing in

The sign-in screen - first-time login is admin / admin123

1. Open the app. The first time, a short setup wizard asks your business name, type, country and phone - the app then shows only the tools your trade needs.
2. Sign in with **admin / admin123** the first time, then change the password in Settings → Account & licence.
3. Create an account for each staff member (section 10) so every sale records who served.

TIP Staff can switch quickly at the till with a 4-digit PIN - press “Switch user (PIN)” at the bottom of the sidebar.

4. Selling at the till (Point of Sale)

The screenshot shows the Solumed POS interface. On the left is a sidebar with navigation options: Dashboard, Point of Sale, Kitchen, Inventory, Users, and Settings. The main area is titled 'Point of Sale' and shows a list of products with their prices and quantities. A search bar is at the top. On the right, there's a payment section with options for Cash, MoMo, Card, Bank Transfer, Split, and Credit. The total amount to pay is UGX 26,500, and the amount received is 30,000. The drawer is locked, and the user is prompted to enter the amount received to open the drawer. The bottom of the screen shows a grid of quick-tap items.

The Sell tab - search or quick-tap items on the left, payment on the right

4.1 Ring up a sale

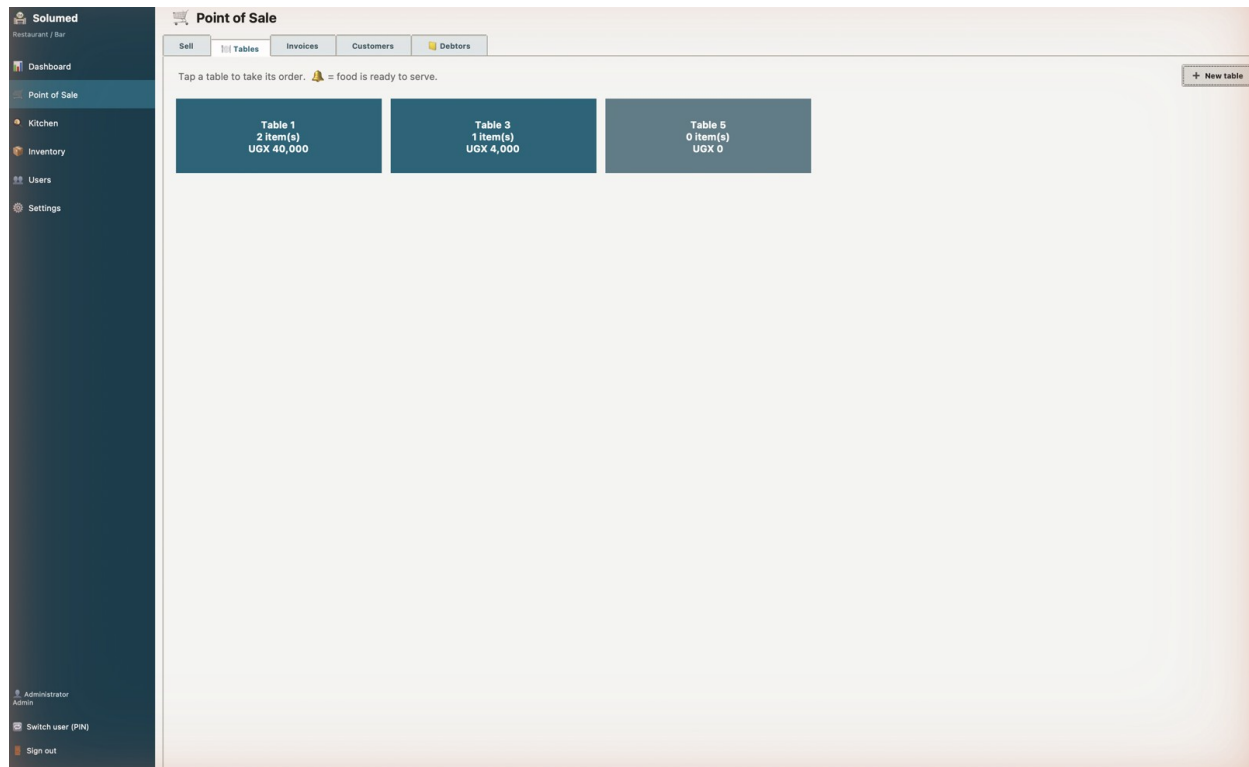

1. **Add items:** tap them on the Quick-tap grid, OR type part of the name in “Type to find a product” and press Add, OR scan a barcode - the scanner box at the top is always listening.
2. **Adjust a line:** select it, then use - / + / Qty... to change quantity, or Void to remove the line.
3. **Choose payment:** Cash, MoMo (mobile money), Card, Bank Transfer, Split (part cash, part MoMo), or Credit (customer pays later - goes to the Debtors book).
4. **Type the amount received** - the app shows the change and unlocks the cash drawer.
5. Press **Complete sale (F12)**. The receipt can print automatically - tick “Auto-print receipt after each sale”.

TIP Keyboard shortcuts are printed on the bar at the bottom of the POS screen: F1 lookup, F2 quantity, F5 discount, F6 hold, F12 pay. On a Mac the same work as Cmd-1, Cmd-2 ... Cmd-9.

4.2 Discounts, parked sales and commissions

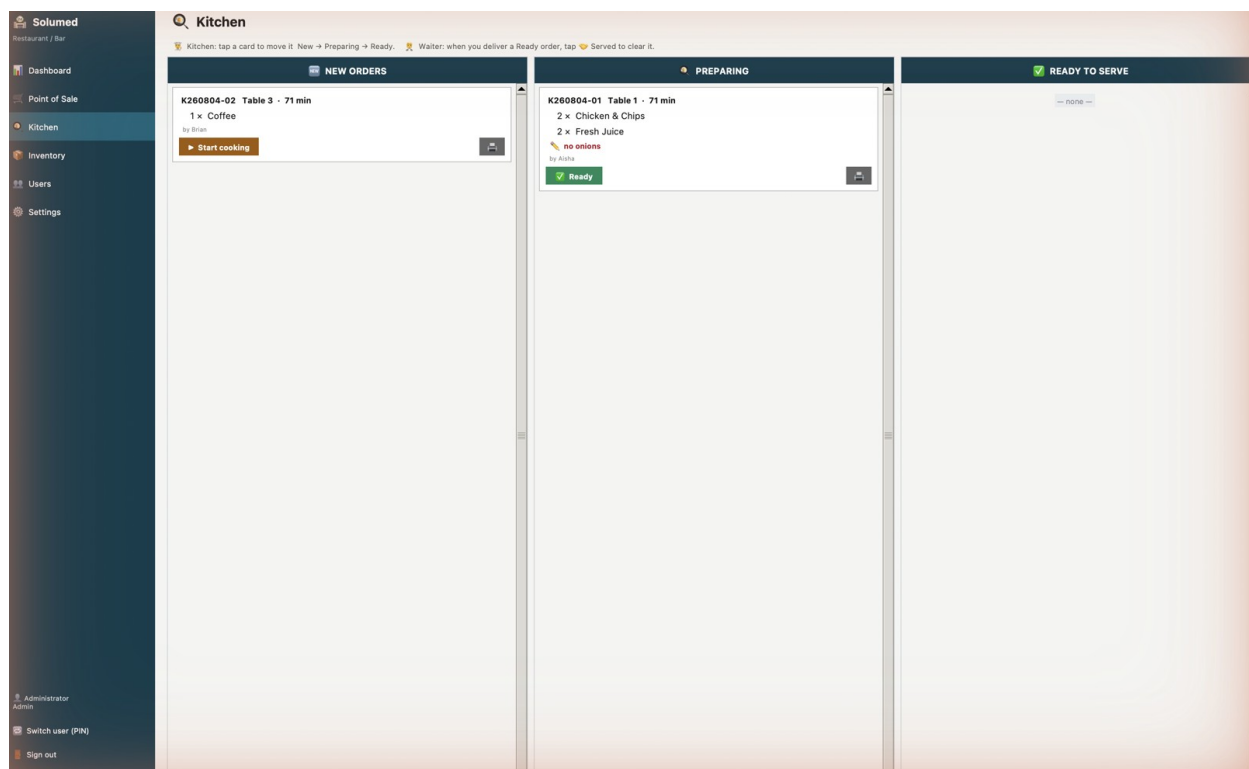

- Order discount - type an amount in the Order discount box; line discounts via Qty... dialog.
- Park / Resume - put a sale on hold while you serve someone else, then bring it back.
- Commission split - share one sale between several staff (e.g. salon stylists): press “Commission split...” before completing.
- Customer - pick a saved customer so the sale appears on their history (needed for Credit sales).

5. Restaurants & bars - tables and the kitchen board

Point of Sale → Tables - one card per table; dark = has an open order

1. Open Point of Sale → Tables and tap a table to take or edit its order (add a table with + New table).
2. Add the dishes and drinks like a normal sale, then press “Send to kitchen” - the kitchen sees the new items instantly (only the NEW items are sent, so nothing is cooked twice).
3. When the guests are done, open the table and take payment as usual - the table clears.

The Kitchen board - orders move New → Preparing → Ready with one tap

The Kitchen page is a 3-column board for the kitchen screen or the waiter's phone. Tap a card to move it from NEW ORDERS to PREPARING to READY TO SERVE; the bell shows the waiter food is ready. Special requests typed at the table (e.g. "no onions") appear in red on the ticket, and a kitchen printer can print each ticket automatically (Settings → Business, taxes & printers → Kitchen printer).

6. Invoices & e-invoicing

Point of Sale

Sell | Tables | Invoices | Customers | Debtors

Invoices sent — 1
billed UGX 590,000

Paid in full — 0
received UGX 300,000

Pending — 1
owed UGX 290,000

New invoice (for B2B / credit billing — for walk-in sales use Sell)

Customer: Hotel Pearl (corporate) | Invoice no.: INV-202608041412 | Issue date: 2026-08-04 | Due date: 2026-08-04

Subtotal (before VAT): | Add VAT | Create invoice

Details / description (appears on the printed invoice)

Number	Customer	Issued	Due	Total	Paid	Status
INV-20260801	Hotel Pearl (corporate)	2026-08-01	2026-08-15	UGX 590,000	UGX 300,000	Partial

Record payment on selected — amount: | Cash | Record payment | Print invoice | e-Invoice (A4) | Copy for WhatsApp

Point of Sale → Invoices - B2B/credit billing with a live paid/pending summary

1. Open Point of Sale → Invoices. Pick the customer, check the invoice number and dates, enter the subtotal and a description, and press Create invoice.
2. Record payments against an invoice as they come in (part-payments are fine) - the status moves Unpaid → Partial → Paid.
3. **Print invoice** prints on your company letterhead; **e-Invoice (A4)** prints the URA-style e-invoice layout (sections A-F with QR code) for tax-compliant billing.
4. "Copy for WhatsApp" puts a tidy text version on the clipboard to send to the customer.

7. The Debtors book - who owes you

Solumed
Restaurant / Bar

Point of Sale

Sell | Tables | Invoices | Customers | **Debtors**

2 customer(s) owe you UGX 70,300 in total

Customer	Receipt	Date	Sale total	Paid so far	Still owes
Nakato Grace	R20260804C1	2026-08-04	UGX 29,500	UGX 0	UGX 29,500
Hotel Pearl (corporate)	R20260803C1	2026-08-03	UGX 70,800	UGX 30,000	UGX 40,800

Record payment | Payment history | Refresh | Tip: sell on credit from the Sell tab - payment method "Credit / Account" with the customer's name.

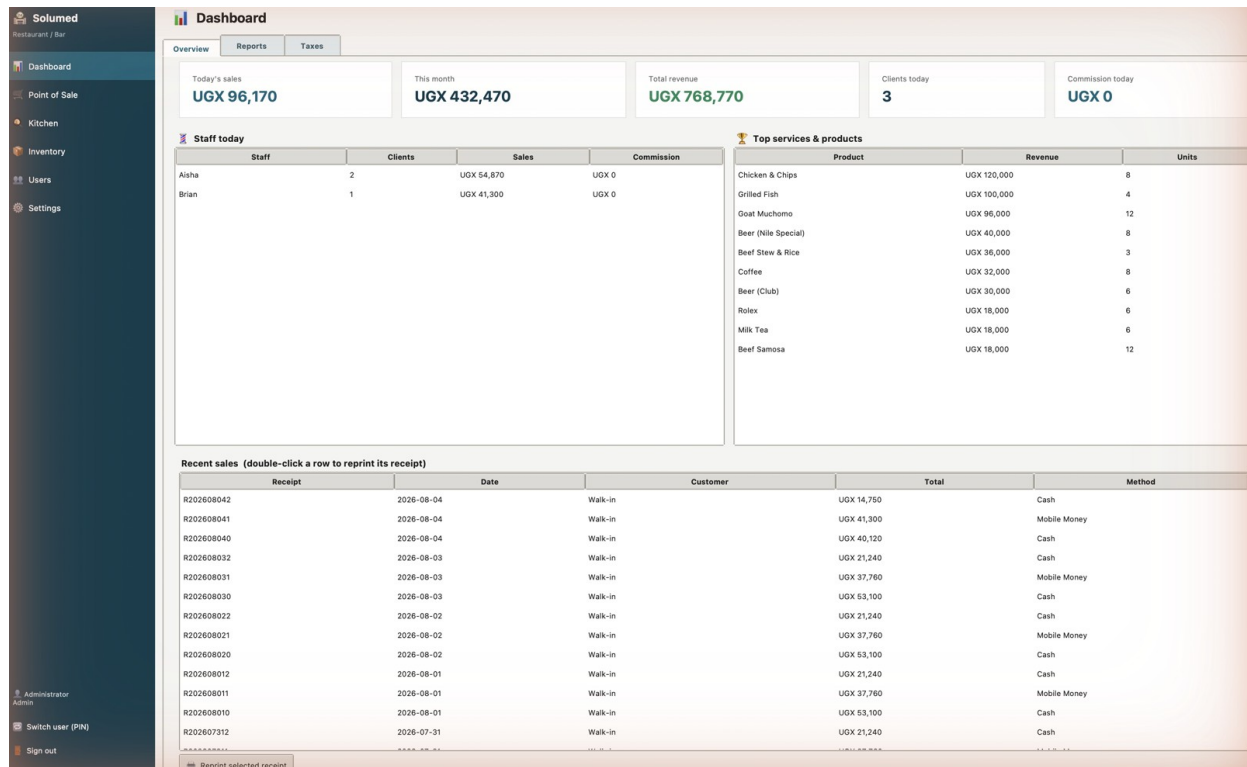

Point of Sale → Debtors - every unpaid credit sale in one list

Any sale completed with the Credit payment method lands here automatically, under the customer's name. The header shows the total owed to you at a glance.

1. Select the debt, type the amount received, and press Record payment - part-payments are tracked until the balance clears.
2. Payment history shows every repayment ever taken.

TIP Only sell on credit to saved customers (with a phone number) - chasing "Walk-in" is hard.

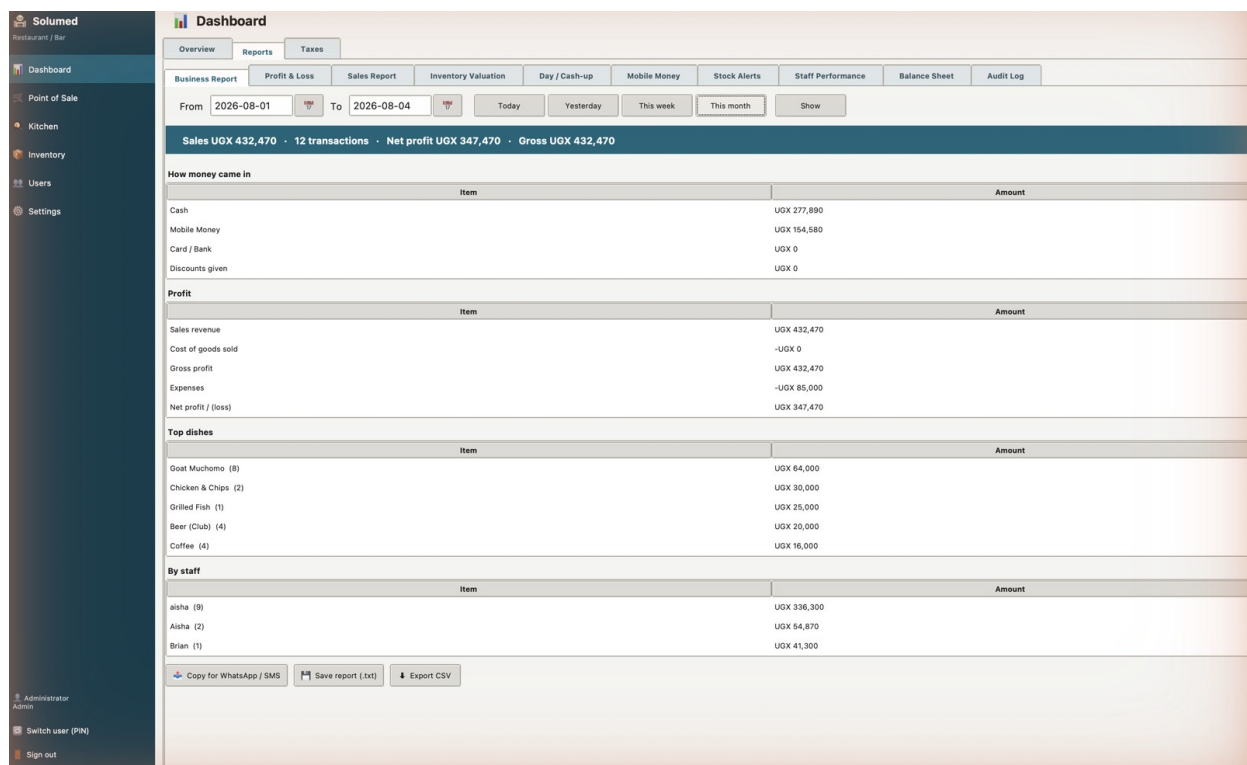

8. The Dashboard - your day at a glance

Dashboard → Overview - today's sales, month, staff performance, top sellers, recent receipts

- Today's sales, This month, Total revenue - live as you sell.
- Staff today - who served how many clients and how much they sold.
- Top services & products - what actually makes you money.
- Recent sales - double-click any row to reprint its receipt.

9. Reports & taxes

Reports live under Dashboard → Reports. Pick a date range (Today, Yesterday, This week, This month or custom) and choose a tab: Business Report, Profit & Loss, Sales Report, Inventory Valuation, Day/Cash-up, Mobile Money, Stock Alerts, Staff Performance, Balance Sheet and Audit Log.

- Every report can be exported: Copy for WhatsApp/SMS, Save as text, or Export CSV for Excel.

Inventory - every item with price, cost, stock level and a low-stock status light

10.1 Add and edit items

1. Use the Add Service / Add Product tab to create items one by one, or Import from CSV to load a whole price list at once (Download CSV template gives you the exact columns).
2. Double-click any item to edit it - including its barcode:

The screenshot shows a mobile application interface for editing a product. The form is titled 'Edit Item' and contains the following fields:

- Name: Soda
- SKU / Barcode: 6009510801234
- Category: (empty)
- Unit: bottle
- Cost price: 1400
- Selling price: 2000
- Stock qty: 120
- Reorder level: 5
- Supplier: none
- Expiry date: (empty)

At the bottom right of the form, there are two buttons: 'Add' and 'Save'.

Editing an item - the SKU / Barcode field links a scanner barcode to the product

TIP To link a barcode fast: double-click the product, click the SKU/Barcode box, scan the item once, Save. From then on scanning it at the till adds it instantly.

10.2 Keep stock true

- Restock selected - add qty: receive new stock in two clicks.
- Stock-take: count the shelf, enter real quantities, and the app adjusts with a full audit trail.
- Stock Movements: every in/out with who, when and why.
- Expiry tracking: give batches an expiry date - expiring stock shows up before it is lost.

10.3 Purchase orders

Inventory → Expenses - rent, power, transport... recorded in seconds

Record every business expense (date, category, vendor, amount). Expenses feed straight into the Business Report and Profit & Loss, so your profit figure is real.

11. Users, staff & payroll

Username	Full name	Role	Status
admin	Administrator	Admin	Active
brian	Brian Okello	Cashier	Active
cathy	Cathy Apio	Cashier	Active
alisha	Alisha Namuli	Manager	Active

Users & Staff - accounts with roles; manage passwords, PINs and access

- Roles: Admin (everything) · Manager (day-to-day) · Cashier (POS only).
- Set PIN gives each staff member a 4-digit code for fast till switching.
- Staff & Payroll tab: employees, salaries, NSSF/PAYE - payroll costs flow into your reports.
- Audit Log (Dashboard → Reports) records every sensitive action - voids, price changes, deletions.

12. SBM Premium - one shop on many devices (NEW)

Standard SBM keeps each till's data on that device (with multi-till over shop Wi-Fi - section 13). SBM Premium goes further: every till signs into one cloud account, and they all stay synchronised over the internet - same products, same stock, same sales - even when each device uses its own connection in a different part of town.

- Sell on till A, and till B sees the sale and the new stock level within seconds.
- Each till keeps working fully offline; it catches up automatically when internet returns.
- Premium is a monthly subscription per shop, on top of the normal licence. Your tills NEVER stop selling if the subscription lapses - only the syncing pauses until you renew.

12.1 Create the shop account (once, on the till that has your data)

The screenshot shows the Solumed Settings page. The left sidebar contains navigation links: Restaurant / Bar, Dashboard, Point of Sale, Kitchen, Inventory, Users, and Settings (highlighted). The main content area is titled 'Settings' and includes sections for 'Features & display', 'Backup, restore & updates', and 'Network & cloud (multi-till - Premium - dashboard)'. The 'Network & cloud' section is expanded, showing options for 'Multi-till (shop Wi-Fi network)' and 'Solumed Cloud - one shop on many devices (Premium)'. The 'Solumed Cloud' section has a 'Create shop account' button and a 'Sign in to existing account' button. Below this, there is a section for 'Solumed Online - owner dashboard' with fields for 'Server address', 'Shop ID', 'Push token', and 'Every (min)'.

Settings → Network & cloud → Solumed Cloud - before signing in

1. Open Settings → Network & cloud and find “Solumed Cloud - one shop on many devices (Premium)”.
2. Press Create shop account and enter your shop name, an email and a password:

The screenshot shows the Solumed Settings page with the 'Create shop account' dialog box open. The dialog box has fields for 'Shop name' (Kampala Fresh Mart), 'Email' (demo@kampalafreshmart.ug), and 'Password' (masked with dots). There is a 'Create account' button at the bottom of the dialog. The background shows the 'Network & cloud' section of the settings page, with the 'Solumed Cloud - one shop on many devices (Premium)' section visible.

Change password Sign out this till

Send full shop copy to cloud Get full shop copy from cloud

Use these once when adding a new till: ‘Send’ from the till that has the shop’s data, then ‘Get’ on the new till.

Solved Online – owner dashboard

Watch this shop from anywhere on your phone. The shop stays fully offline – when internet is available, the till sends a small summary to your dashboard. Ask your vendor for the three details below to activate.

Enable Solved Online on this till

Server address Shop ID Push token Every (min)

1

Save & push now not enabled

Signed in - the green line shows the account, shop and last sync time

- Change password - any till can change the shop account password.

- Sign out this till - detaches just that device.
- Send / Get full shop copy - one-time buttons used when attaching a till that already had data.

NOTE Your Premium expiry date shows in this section. Renew through your agent or Solumed Plus - months stack on top of whatever time you still have.

13. Multi-till on shop Wi-Fi (no internet needed)

Several tills in ONE room can also share stock with no internet and no subscription: make one device the Main till (it holds the data) and connect the others as extra tills over the shop Wi-Fi. Set this up under Settings → Network & cloud → Multi-till: choose the role, and on extra tills type the main till's address shown on its screen, then Test connection and Save.

TIP Use Wi-Fi multi-till for tills standing side by side; use Premium when devices are far apart, on different connections, or you want an off-site copy of everything.

14. Solumed Online - the owner's phone dashboard

Watch the shop from anywhere: the till sends a small summary to your private online dashboard whenever internet is available (the shop itself stays fully offline). Ask your vendor for the three details - server address, Shop ID and push token - and enter them under Settings → Network & cloud → Solumed Online, tick Enable, and press Save & push now. Then open the dashboard link on your phone to see sales, top products and history, per day or per period, with PDF export.

15. Backups, restore & updates

The screenshot shows the Solumed Settings app interface. The left sidebar contains navigation options: Restaurant / Bar, Dashboard, Point of Sale, Kitchen, Inventory, Users, and Settings (selected). The main content area is titled 'Settings' and includes sections for Receipt printer, Kitchen printer, Receipt footer, Features & display, Backup, restore & updates, and Network & cloud (multi-till · Premium · dashboard). The 'Backup, restore & updates' section is currently active, showing options to download backup, restore from backup, erase data / start fresh, back up to cloud now, restore from cloud, check for updates, test barcode scanner, and test receipt printer. The 'Network & cloud' section shows options for Multi-till (shop Wi-Fi network) and Single till (this device only), with the 'Main till' option selected. The 'Main till' section includes fields for Main till address, Port (8770), and Network password (optional), along with buttons for Test connection and Save network settings.

Settings → Backup, restore & updates - your whole system is one file

- Download backup - saves everything to one file. Keep a copy on a flash disk or Google Drive every week.
- Restore from backup - brings a till back exactly as it was; use it when replacing a computer.
- Back up to cloud now / Restore from cloud - one-tap off-site backup to your online server.
- Erase data / start fresh - clears demo/test activity before going live (makes a safety backup first).

- Check for updates - tells you when a newer version is available.
- Test barcode scanner / Test receipt printer - verify hardware in seconds.

NOTE The app also makes automatic daily backups on the device, and reminds you if you have not backed up for a while.

16. Settings at a glance

Settings - five tidy groups; click a heading to open it

- Business, taxes & printers - name, type, contacts, VAT/NSSF rates, receipt & kitchen printers, receipt footer.
- Features & display - Advanced mode, “also sell commodities” for service businesses, and Display size (make all text bigger on small screens).
- Backup, restore & updates - section 15.
- Network & cloud - multi-tilt, SBM Premium, Solumed Online (sections 12-14).
- Account & licence - your password, licence status and Machine ID.

Features & display

Features shown

Solumed hides tools your trade doesn't need so the screen stays simple. Turn these on only if you need them.

Advanced — show every feature (for power users)

Also sell commodities — unlock cost price, stock count, units and suppliers (e.g. a salon that also sells shampoos)

Save feature options

Display size

Normal (100%)

Apply

Makes all text in the app bigger or smaller. Takes effect after you close and reopen the app.

Backup, restore & updates

Network & cloud (multi-tilt · Premium · dashboard)

Multi-tilt (shop Wi-Fi network)

Run several tills in one shop off your local Wi-Fi (no internet). ONE device is the 'Main till' that holds the data; the others connect to it and share the same live stock and one combined report.

Single till (this device only)

Main till — hold the data here (server)

Connect to the Main till (extra till)

This device keeps its own separate data.

Main till address

Port

Network password (optional)

Save network settings

Solumed Cloud — one shop on many devices (Premium)

Create one account for your shop, sign every till into it, and they all sync over the internet — same products, same stock, same sales — even with each device on its own connection.
