

Solumed Business Manager

User Manual

The offline-first point-of-sale & business app
for shops, pharmacies, salons, restaurants, hotels
and mobile-money agents.

Android - Windows - macOS

Now with online owner dashboards & cloud backup.

What's in this manual

This guide walks you through Solumed Business Manager step by step, with pictures of the real app. It applies to all three versions - Android, Windows and macOS - which work the same way.

- 1. Getting started - install, first sign-in and set-up
- 2. The Dashboard - your day at a glance
- 3. Point of Sale - ringing up a sale
- 4. Services & staff commission (salons, clinics, workshops)
- 5. Inventory - products, stock, suppliers
- 6. One app per trade - only the tools you need
- 7. Reports - day, week, month and custom periods
- 8. Debtors & invoices - selling on credit
- 9. Staff & users - logins and payroll
- 10. Settings
- 11. Many tills in one shop (Wi-Fi)
- 12. Online: owner dashboards & cloud backup
- 13. Everyday tips & support

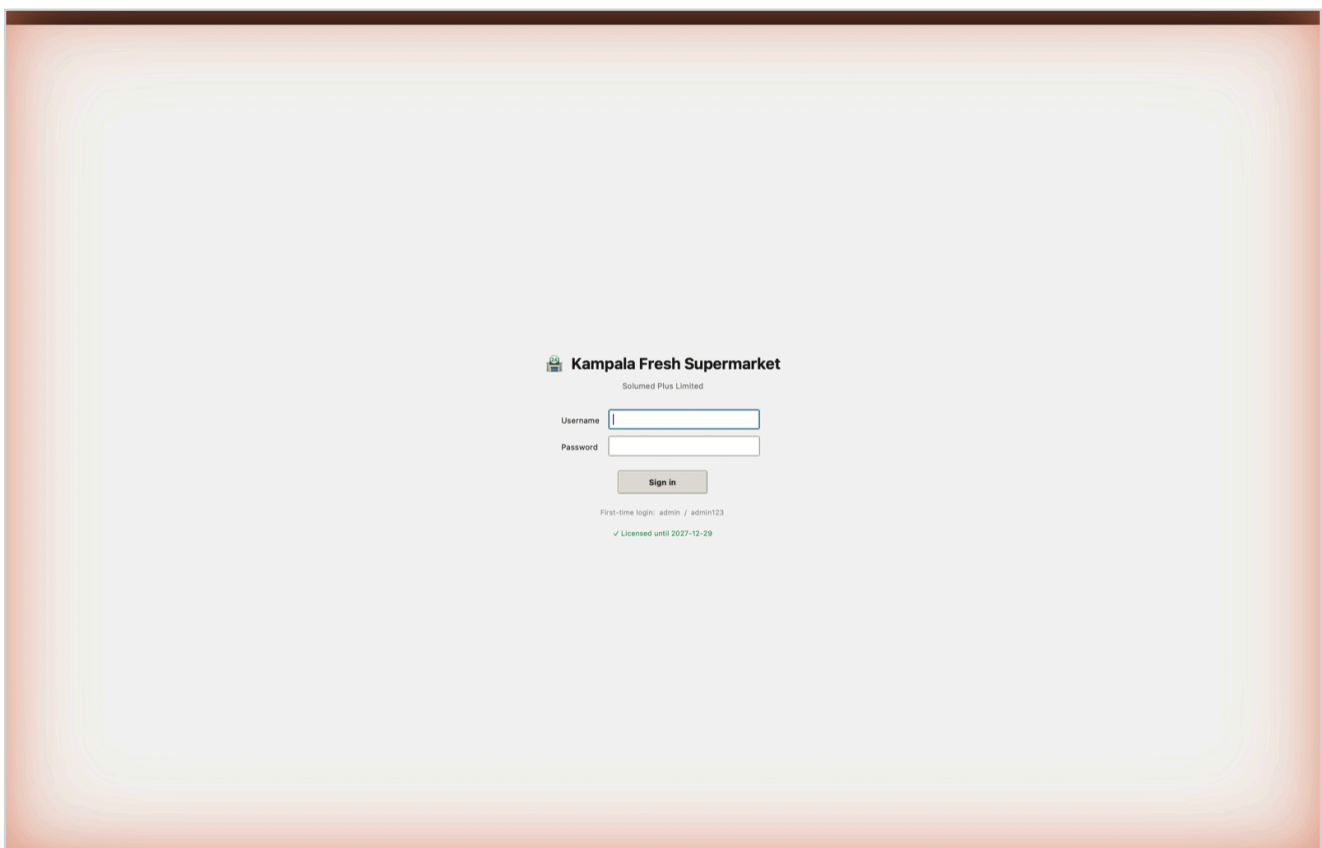

1. Getting started

Install

- Android: open the APK from solumedplus.com and tap Install (allow 'install from this source' if asked).
- Windows: run Solumed-Setup.exe and click through - it adds a Desktop and Start-menu shortcut.
- macOS: open the DMG and drag Solumed Business Manager to Applications.
- Once installed it runs fully offline - no internet needed to sell.

First sign-in

The first time you open the app, sign in with the starter account: username admin, password admin123. You'll be asked to set up your business - name, type, country, phone and address. The business type you pick reshapes the whole app for your trade (see section 6).

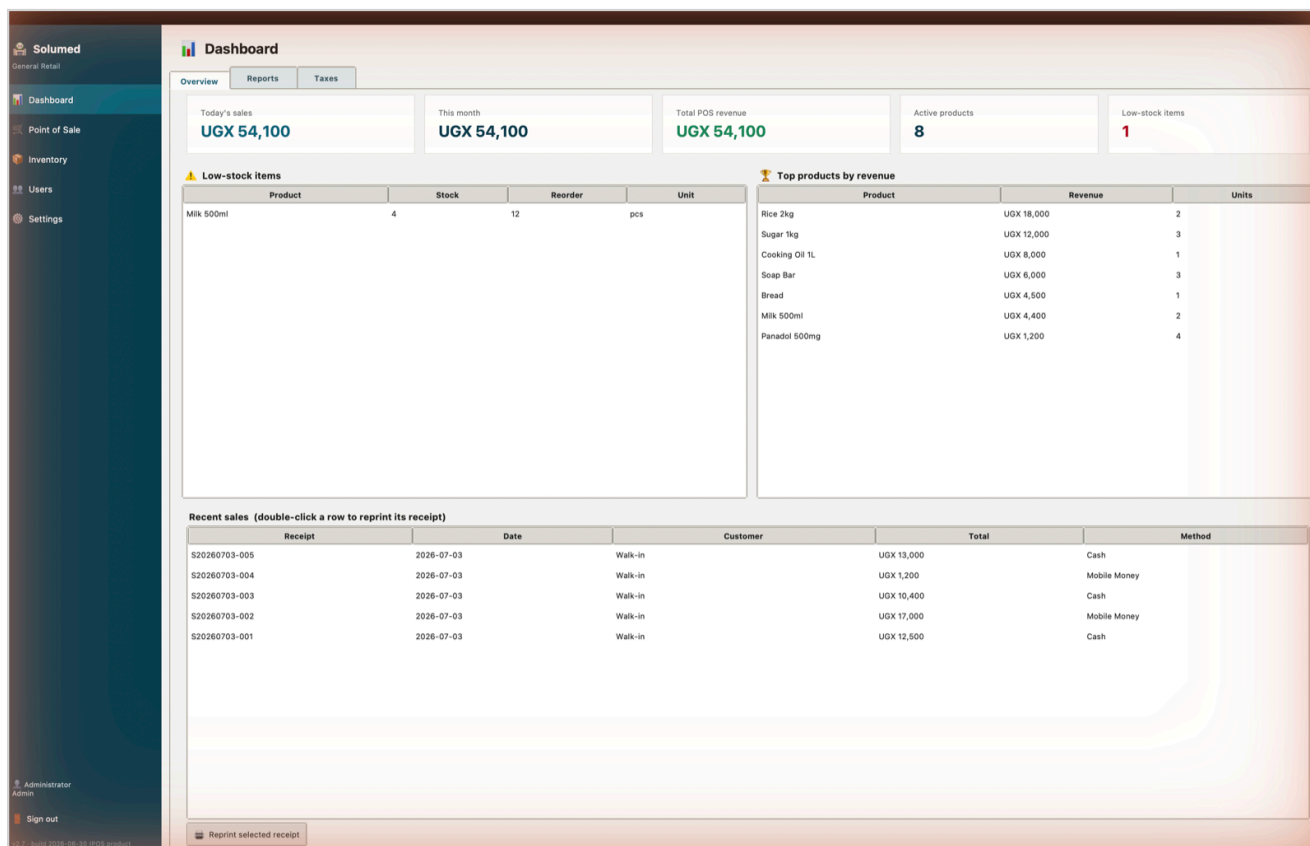

The sign-in screen. After the first setup, staff can unlock quickly with a PIN.

Tip: give every staff member their own login under Staff & Users, and set a short PIN so they can switch tills in seconds without typing a password.

2. The Dashboard

The Dashboard is your home screen. At a glance it shows today's sales, the number of transactions, how much came in as cash versus mobile money, your month total, low-stock warnings and top sellers. It's the first thing an owner checks each morning.

The Dashboard - today's takings, payment split, best sellers and alerts.

3. Point of Sale (selling)

Point of Sale is where you ring up a sale. Search a product by name or scan its barcode, tap to add it to the basket, adjust quantities, and take payment.

- Search or scan to add items; tap - / + to change quantity, or type an exact amount.
- Give a discount (a cashier needs a manager's approval for discounts).
- Take Cash, Mobile Money, Card, a Split of these, or put it on a customer's account (credit).
- The big CHANGE figure shows the customer exactly what to collect.

The screenshot shows the 'Point of Sale' interface. On the left is a sidebar with navigation options: Solumed, General Retail, Dashboard, Point of Sale, Inventory, Users, and Settings. The main area is titled 'Point of Sale' and has tabs for 'Sell', 'Invoices', and 'Customers'. Below the tabs are input fields for 'Scan barcode' and 'Add by code'. A search bar labeled 'Type to find a product' is followed by a list of items: Bread (UGX 4,500, 23 pcs left), Cooking Oil 1L (UGX 8,000, 24 L left), Exercise Book (UGX 1,800, 120 pcs left), Milk 500ml (UGX 2,200, 4 pcs left), and Panadol 500mg (UGX 300, 196 tablet left). Below this is a table with columns 'Item', 'Qty', 'Price', and 'Total'. It contains one row: Bread, Qty 2, Price 4,500, Total 9,000. At the bottom of the table are buttons: 'Remove item', 'Clear cart', 'Park sale', and 'Resume'. On the right is the 'Checkout' section. It includes an 'Order discount' field with value 0. A large green box displays 'TOTAL TO PAY UGX 9,000'. Below this is 'Subtotal UGX 9,000'. The 'Payment method' is set to 'Cash'. The 'Amount received' is 10000. A green button shows 'Change UGX 1,000'. The 'Customer' field has 'Walk-in' entered. A note says 'Drawer opens on completing the sale.' At the bottom is a green button with a checkmark and the text 'Complete sale'.

Checkout - the large total and change display, and one green 'Complete sale' button.

After completing a sale the receipt appears on the right. Print it to a connected or Bluetooth printer, or share it on WhatsApp. You can re-print any past receipt later.

4. Services & staff commission

Service businesses - salons, barbershops, clinics, guesthouses, workshops - sell services, not stock. When your business type is a service trade, the app treats each item as a service (no stock is tracked) and lets you pay commission to the staff who performed it.

Splitting commission between staff

A single service can pay several people at their own rate. For example, on one haircut the barber earns 33% and the stylist who washed and finished earns 10%. At the till, add the service, then tap 'Commission split' and add each person with their percentage. Each person's share is tracked separately and shows up under Staff Performance in Reports.

- Pick the current performer at the top of checkout - each service you add is credited to them.
- Tap 'Commission split' on a line to share one service between two or more staff.
- See who earned what under Reports -> Staff Performance.

5. Inventory

Inventory is where your products and stock live. Add products one by one, or import a whole list from the Excel template (it has drop-down menus to keep categories and units tidy). For shops that carry stock you also get suppliers, stock-take and stock movements.

Solumed
General Retail

Inventory

Products | Add Product | Stock-take | Stock Movements | Suppliers | Expenses

Stock at cost: **UGX 727,700**

Stock at selling: **UGX 1,066,100**

Low-stock items: **1**

Expiring within 60 days: Milk 500ml (2026-07-23), Bread (2026-07-06)

Filter by category: All

Name	Category	Supplier	Price	Cost	Stock	Unit	Status
Bread	Bakery	Acme Distributors	UGX 4,500	3,500	21	pcs	OK
Cooking Oil 1L	Food & Beverages	Acme Distributors	UGX 8,000	6,000	24	L	OK
Milk 500ml	Food & Beverages	Acme Distributors	UGX 2,200	1,500	4	pcs	Low
Rice 2kg	Food & Beverages	Acme Distributors	UGX 9,000	7,000	28	kg	OK
Sugar 1kg	Food & Beverages	Acme Distributors	UGX 4,000	3,000	37	kg	OK
Soap Bar	Household	Acme Distributors	UGX 2,000	1,200	48	pcs	OK
Panadol 500mg	Medicines	PharmaPlus Ltd	UGX 300	100	196	tablet	OK
Exercise Book	Stationery	Acme Distributors	UGX 1,800	1,000	120	pcs	OK

Restock selected — add qty:

Bulk add products:

TIP: double-click a product to edit. CSV columns: name, category, unit, cost, price, selling price, stock, qty, reorder level, sku, vat, supplier, expiry date.

The product list - stock levels with green / red status dots and reorder alerts.

Adding a product

- Name, selling price, category and unit are the essentials.
- Add cost price, quantity in stock, reorder level and a supplier to track stock and profit.
- Groceries and pharmacies also get batch numbers and expiry dates, with 'expiring soon' alerts.
- Barcodes can be scanned at the till.

The Add-Product form. Service businesses see a simpler form with no stock fields.

6. One app, shaped for your trade

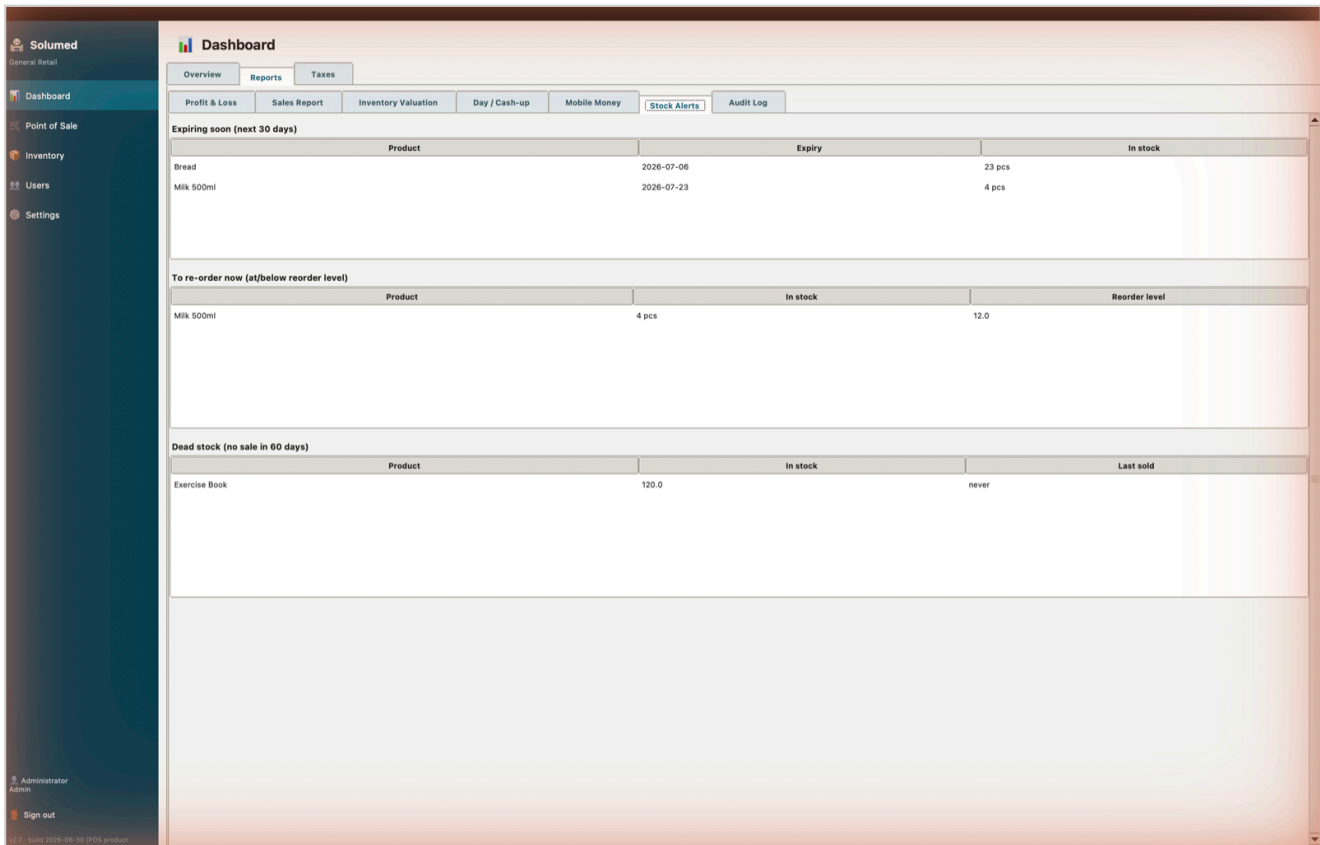

You never wade through features you don't need. Pick your business type in Settings and the app hides the irrelevant tools and shows the right ones:

- General shop / supermarket: full inventory, suppliers, stock-take, expiry alerts.
- Pharmacy / clinic: the above plus prescriptions and batch / expiry tracking.
- Salon / barbershop: services and staff commission - no stockroom clutter.
- Restaurant / bar & Hotel / guesthouse: tables, room folios and services.
- Mobile-money agent: a float ledger instead of a stockroom.

A salon that also sells a few products (shampoos, drinks) can switch on 'Also sell commodities' in Settings to unlock cost price, stock, units and suppliers. Power users can turn on 'Advanced' to see every feature.

7. Reports

Reports turn your sales into the numbers an owner actually wants: a business summary, profit & loss, sales report, inventory valuation, day / cash-up, mobile-money, staff performance and a balance sheet. Choose any day, this week, this month, or a custom date range, and download it as a PDF.

The screenshot shows the Solumed Business Manager Dashboard. The left sidebar contains navigation links: General Retail, Dashboard, Point of Sale, Inventory, Users, and Settings. The main content area is titled 'Dashboard' and includes tabs for Overview, Reports, and Taxes. Under the Reports tab, there are sub-tabs for Profit & Loss, Sales Report, Inventory Valuation, Day / Cash-up, Mobile Money, Stock Alerts, and Audit Log. The 'Stock Alerts' sub-tab is active, displaying three sections of inventory data:

Expiring soon (next 30 days)			
Product	Expiry	In stock	
Bread	2026-07-06	23 pcs	
Milk 500ml	2026-07-23	4 pcs	

To re-order now (at/below reorder level)			
Product	In stock	Reorder level	
Milk 500ml	4 pcs	12.0	

Dead stock (no sale in 60 days)			
Product	In stock	Last sold	
Exercise Book	120.0	never	

At the bottom of the dashboard, it shows the user is Administrator Admin and provides a Sign out button. The footer indicates the date and time: 2026-06-24 10:30 (GMT+01:00).

A report view - pick the period and send or print it.

8. Debtors & invoices

Sell on credit and always know who owes you. The Debtors book records each credit sale, part-payments and cleared debts - replacing the exercise book every shop keeps. Any business can also raise professional invoices, including proforma invoices, with your company header - useful when you supply a company or office.

9. Staff & users

Under Users you create logins for your team (Admin, Manager or Cashier) and manage staff and payroll. Staff on commission only don't need a salary entered - leave it at 0 and the app records them as 'commission only'.

Users & Staff

User Accounts Staff & Payroll

Create a staff account

Username Full name Role Password Create

Username	Full name	Role	Status
admin	Administrator	Admin	Active
mary	Mary N.	Cashier	Active
joan	Joan A.	Manager	Active

Manage selected user

Set role Reset password

Cashier Update role Set password Toggle active Delete user

Select a user in the table above, then use these actions: Admin = full access - Manager = day-to-day - Cashier = POS only

Staff & payroll - add your team, set roles, run payroll.

10. Settings

Settings holds your business details (shown on receipts and invoices), business type, tax / VAT rate, receipt printer and footer, display size, backup & restore, and the online options. Change your business type here at any time.

Settings

Business details

Business name: Business type:

TIN: Registration no.:

P.O. Box: Phone:

Email: Address:

Currency code: VAT rate (e.g. 0.18):

NSSF employee rate (e.g. 0.05): NSSF employer rate (e.g. 0.10):

Receipt printer: Receipt footer:

Detected default printer: Kyocera_TASKalfa_3010i_13. Choose your receipt printer above and Save -- then 'Print receipt' prints to it instantly, with no dialog.

Backup & Restore

Your whole system is one file. Back it up to a flash disk or Drive regularly -- that file is all you need to restore.

Multi-till (shop network)

Run several tills in one shop off your local Wi-Fi (no internet). ONE device is the 'Main till' that holds the data; the others connect to it and share the same live stock and one combined report.

☒ Single till (this device only)

☐ Main till -- hold the data here (server)

☐ Connect to the Main till (extra till)

This device keeps its own separate data.

Main till address: Port: Network password (optional):

Change my password

New password - Confirm password

License

☒ Licensed until 2027-12-29

Settings - business details, tax, printer and more.

11. Many tills in one shop (Wi-Fi)

Running more than one till in the same shop? Set one device as the 'Main till' that holds the data; the others connect to it over your local Wi-Fi and share the same live stock and one combined report. No internet and no monthly fee - it all happens on your own network.

12. Online: owner dashboards & cloud backup

Solumed can now put your shop online - while the till stays fully offline. When the till finds internet it quietly sends a small summary to your private online dashboard, so you can watch the shop from anywhere.

Your online dashboard

- Open your private link on any phone or computer to see today, this week, this month or any date range - with a Download PDF button.
- It shows sales, cash vs mobile money, top items, staff commission and more.
- It is read-only and shows business figures only - never your customers' personal details.
- Owners who invest from afar can monitor several shops without being in the shop.

Cloud backup & restore

In Settings, Backup & Restore, tap 'Back up to cloud now' to save your whole system online. If a device is ever lost, stolen or damaged, install the app on a new one, enter your online details, and tap 'Restore from cloud' - your business comes straight back. There's also 'Check for updates' to know when a newer version is available.

13. Everyday tips & support

- Back up at the end of each day - to a flash disk, and to the cloud if you're online.
- Give each staff member their own login and PIN.
- Use the Excel import template to load your products quickly.
- Do a stock-take regularly so your figures stay honest.
- The app keeps working with no internet - internet only powers the online dashboard and cloud backup.
